DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-30, drawn to conversion of print data into code data, classified in class 358, subclass 1.15.
 - II. Claims 31-33, drawn to displaying of setting picture plane for allowing one of an auto mode, an image mode, and PDL mode to be set, classified in class 358, subclass 1.13.
2. The inventions are distinct, each from the other because of the following reasons:
3. Inventions Group Group II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because Group I discloses converting print data into image data and converting print data into code data. The subcombination has separate utility such as displaying a setting picture plain for allowing one of an out mode, an image mode, and PDL mode to be set.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
